

Cloud Enablement Engineer

Summary

Cloud Enablement Engineer with 4+ years of experience in distributed systems, streaming data architectures (**Apache Kafka**), and cloud infrastructure (**AWS**). Proficient in **Python** and **Java** for developing high-quality code examples and robust automation. Adept at creating technical content, troubleshooting complex cloud issues, optimizing system performance, and enabling cross-functional teams to leverage cloud-native technologies (Docker, Kubernetes, Terraform, CI/CD). Passionate about empowering users and driving technical adoption through clear documentation, how-to guides, and live technical support.

Technical Skills

Cloud & DevOps	AWS (EC2, SaaS, IaaS), Terraform , Ansible , Docker , Kubernetes , CI/CD (Jenkins), Git
Streaming & Data	Apache Kafka (Confluent concepts), Distributed Systems, Data Processing (Flink , Spark), SQL , NoSQL
Languages	Python , Java , Golang , C/C++ concepts, Bash
Enablement	Technical Content Creation , Live Technical Support, Troubleshooting, System Optimization, Documentation

Experience

- Jul 2026 – Present **Senior Engineer (Cloud Enablement Focus)**, *Tata Elxsi*, Chennai
 - Developed and maintained high-quality, well-documented guides and code examples in **Python** and **Java** to enable teams to seamlessly migrate secret storage to AWS Secrets Manager.
 - Provided live technical support and guidance to cross-functional teams, successfully automating secret rotation for a distributed system handling 2M+ users and overcoming complex implementation challenges.
 - Created engaging technical articles, how-to guides, and hosted internal walkthroughs on enforcing cloud security controls, Kubernetes orchestration, and scaling strategies.
 - Troubleshot cloud infrastructure issues and optimized system performance, collaborating with engineering teams to stay updated on cloud features and best practices.
- Jul 2024 – Jul 2026 **Engineer**, *Tata Elxsi*, Chennai
 - Architected scalable, distributed systems and cloud-native backend services, focusing on secure infrastructure provisioning using **Terraform**, **Ansible**, and **AWS**.
 - Built and optimized a high-traffic platform serving 1M+ users, integrating streaming data architectures to enhance real-time data delivery and system reliability.
 - Configured comprehensive observability solutions to troubleshoot performance bottlenecks, performing Root Cause Analysis (RCA) and optimizing SQL/NoSQL databases.
- Jul 2022 – Jul 2024 **Associate Engineer**, *Tata Elxsi*, Chennai
 - Designed and managed **CI/CD** pipelines and version control systems (**Git**), developing technical tutorials to onboard team members and reducing deployment time by 30%.
 - Authored automation scripts and high-performance backend components in **Java** and **Python** to ensure low-latency data retrieval in distributed environments.
 - Hosted live walkthrough and live coding sessions to demonstrate infrastructure automation capabilities, eliminating manual operational tasks and ensuring reliable cloud deployments.
- Dec 2021 – Jun 2022 **Internship Trainee**, *Tata Elxsi*, Chennai
 - Set up and integrated a robust streaming and observability stack using **Apache Kafka**, Grafana, and Prometheus for real-time system monitoring and event processing.
 - Implemented Open Policy Agent (OPA) for authentication and access control, creating foundational setup guides for multi-tenant environments.
 - Assisted in database management and troubleshooting to support critical application requirements.

Projects

Cloud-Native Portfolio Website & Infrastructure Automation

- Architected and deployed a highly available portfolio platform (*sanjaik.online*) using **Infrastructure as Code**.
- Implemented a fully automated CI/CD pipeline, enforcing security guardrails and secure deployment practices.

Education

2022 – 2024 **Master of Computer Applications (MCA)**, *Kalasalingam University*

Aug 2019 – **B.Sc. Information Technology**, *Dr. N.G.P. Arts and Science College*, CGPA: 7.5
Mar 2022

Certifications

Cloud AWS Certified Solutions Architect - Associate

Development AWS Certified Developer - Associate
