PROFESSIONAL SUMMARY

AWS Certified Solutions Architect & Developer Associate with **4+ years of experience** in building and deploying scalable, cloud-native solutions. Expert in **Golang, Python, and AWS**, combining backend development with DevOps practices to build secure, reliable platforms. Proven track record of optimizing microservices for **1M+ users** and reducing deployment times by **30%** through advanced CI/CD automation (Concourse, Helm). Passionate about infrastructure optimization and observability.

TECHNICAL SKILLS

- **Languages:** Golang, Python, Java
- **Cloud & Infrastructure:** AWS, Terraform, CloudFormation
- **Containerization & Orchestration:** Docker, Kubernetes, Helm
- **DevOps & CI/CD:** Concourse, Jenkins, GitHub Actions, Ansible
- **Observability & Security:** Open Policy Agent (OPA), Kafka, Prometheus, Grafana
- **Databases:** PostgreSQL, MongoDB, MySQL

PROFESSIONAL EXPERIENCE

TATA ELXSI | Trivandrum, Kerala *Dec 2021 – Present*

Engineer

Jul 2024 – Present

- Architected and maintained backend services in **Golang**, enhancing system performance and scalability for enterprise-grade applications.
- Built and optimized a high-traffic **no-code/low-code platform serving 1M+ users**, significantly enabling rapid application development and reducing client time-to-market.
- Collaborated with cross-functional teams to deliver cloud-native solutions on **AWS**, leveraging serverless and compute services including EC2, S3, Lambda, and RDS.
- Spearheaded **infrastructure optimization initiatives**, implementing performance tuning and scaling strategies that improved resource utilization and cost efficiency in AWS environments.

Associate Engineer

Jul 2022 – Jul 2024

- Designed and implemented CI/CD pipelines using **Concourse** and **Helm**, successfully automating infrastructure provisioning and reducing deployment time by **30%**.
- Created a **fully automated deployment pipeline** from scratch, eliminating manual operational overhead.
- Developed and optimized the backend for a high-volume **OTT application**, ensuring low-latency data retrieval and seamless content delivery.
- Wrote comprehensive unit and integration tests to ensure code quality, maintaining high coverage standards.

Internship Trainee

Dec 2021 – Jun 2022

- Implemented **Open Policy Agent (OPA)** for authentication and fine-grained access control, enhancing security compliance across complex multi-tenant environments.
- Integrated a robust observability stack using **Kafka, Grafana, and Prometheus**, enabling real-time system monitoring and proactive issue resolution.
- Optimized SQL and NoSQL database schemas to support critical application requirements.

EDUCATION

B.Sc. Information Technology | CGPA: 7.5 *Dr. N.G.P. Arts and Science College* | Aug 2019 – Mar 2022

+1

CERTIFICATIONS

- **AWS Certified Solutions Architect – Associate**
- **AWS Certified Developer – Associate**
